Extend the properties of exponents to rational exponents **(RN.EPE)**											
Perform arithmetic operations with complex numbers **(CN.POW)**											
Write expressions in equivalent forms to solve problems **(SSE.WEI)**											
Perform arithmetic operations on polynomials **(APR.POO)**											
Understand the relationship between zeros and factors of polynomials **(APR.URB)**											
Rewrite rational expressions **(APR.RRE)**											
Create equations that describe numbers or relationships **(CED.CED)**											
Understand solving equations as a process of reasoning and explain the reasoning **(REI.USE)**											
Interpret functions that arise in applications in terms of context **(IF.IFI)**											
Understand the concept of a function and use function notation **(IF.UCF)**											
Analyze functions using different representations **(IF.AFU)**											
Build a function that models a relationship between two quantities **(BF.BFM)**											
Build new functions from existing functions (**BF.BNF)**											
Construct and compare linear, quadratic, and exponential models and solve problems **(LE.CCL)**											
Summarize, represent, and interpret data on a single count or measurement variable **(ID.SRI)**											
Understand and evaluate random processes underlying statistical experiments **(IC.UER)**											
Make inferences and justify conclusions from sample surveys, experiments, and observational studies **(IC.MIJ)**
